

FUND MANAGER RETURNS 24.55% IN MARCH QUARTER

While the markets are crashing, the Grow Alpha Fund has produced an impressive YTD 2020 gross return of 24.55%. The S&P 500 Index reported a decline of 19.60% over the same period.

Contributors to this strong return included positions in technology and healthcare stocks as well as timely currency conversions.

The fund is a long/short quantitative high conviction fund led by an investment management team with over two decades of investment trading experience headed by Karunan Gunasekaran.

The Grow Alpha Fund managers use sophisticated 8-step Quantitative methodology which embodies best-in-class practices in cyclical analysis, price behaviour, momentum analysis, portfolio management, proprietary synchronized synergies, scalability, prudent leverage and risk management.

Trustee for the fund is Primary Securities Ltd.
